BDCP Framework for Issues (5).docx

;

Kathleen, Lisa –

Attached is a revised powerpoint presentation that we propose to use at the BDCP meeting next Tuesday. Since Maria Rea was not in attendance for our previous presentation, and there will be folks from other agencies at the Tuesday meeting who were also not at the previous meeting, we've retained some of the background slides, as well as a couple slides on the document quality issues, in order to provide a quick overview; but we're putting more emphasis on the water quality issues, the interface between NEPA/ESA and other regulatory requirements, and the need for our issues to be resolved in the Supplemental DEIS.

Also attached – for internal reference, not to be distributed at the meeting -- is a matrix that Stephanie prepared, showing which of the major issues we raised were also raised by, or are relevant to, the State Board, the lead agencies themselves (in their comments on the Admin DEIS last year), the Corps, or other commenters such as the Independent Science Panel. She has highlighted in bold text the statutory/regulatory interests associated with each issue.

We'll both be in the office tomorrow and Monday if you want to discuss any of this.

-Kathy
